Program 1
Date:- 08/05/2024
Time:- 1 Hour
Program Explanation:-

Turn off and Turn on bulb onlick

Create 3 bulbs that are initially in the "off" state by default. Using jquery, when a user clicks on a bulb, it will turn on. If the same bulb is clicked again, it will turn off. Additionally, if one bulb is turned on and the user clicks on another bulb, the previously on bulb will turn off automatically.

Note : Its not compulsory to create same UI as per image, you can create simple as you can, don't waste more time in create UI only focus on jquery logic.
